02 EMPLOYMENT HISTORY

Dec 2019 — Sep 2021

Da Nang

Junior Developer at Open Web Technology

Responsibilities

- 1st Project:
 1. I have a big project in order to connect patients, event management, nurses,... They can connect and chat then they create offline events. => We need to create a Chat application, which can use between mobile and web.
 2. The app must protect user's data as profile, avatar, message, event... by encrypting data.
 3. I create UI from Figma and verify documents with BA(EU team).
 4. I use Reactjs, stream chat, FCM, Virgil security, CoreTS.
 5. Team size: 15 - PM, BA, Designer, Backend, Mobile team, Frontend.

• 2nd Project:

1. I create an application in order to management many things in my company as Employees, Employee's skills, Devices, Request day off,...
2. We need connect with slack API by Backend -> We use NestJS and an library in order to create AI key. So we need control it by back office.
3. I create UI from my knowledge.
4. I use Reactjs, CoreTS.
5. Team size: 4 People.

In 2 projects, I just use Reactjs and React hook. I didn't use Redux because I think that Context API is enough.

Junior Developer at Cinnolab

- When I go to hospital or spa. I can book time for maintenance. The application has many features: schedule, sales promotions, ...
- Developing a prototype of an application with ReactJS with Redux and Typescript about Procoach Spa's CRM.
- Team size: 6 people

Fresher Developer at NPM technology

- Developing a CRM internal.
- Using ReactJS and Redux-thunk infrastructure
- Nguyen's role was to improve UI with Material-UI.
- In this project, I just improve some features and practice my skill.
